Salvia Extract:

What is Salvia Extract ?

Salvia divinorum is a plant that grows abundantly in the wild in certain parts of Mexico. Our **Salvia Extract for Sale** is an extract of the plant's active agent known as Salvinorin-A. This agent is commonly found in Salvia divinorum leaves on Salvia Plants.

Salvinorin-A is what provides this plants amazing ability to heal and provide us with the ability to explore and discover our mind. Salvinorin-A is by far the **most powerful naturally found psycho-active agent in the world.**

In any given pound of dried Salvia leaves you'll find on average around 1.2 mg/g of Salvinorin-A. Once its gone through a process known as extraction each 1lb of leaves would turn into a gram of Salvia 1X.

Salvia Tincture:

Salvia tincture is a **liquid form of salvia**. It's an extract based solution that should only be produced in professional laboratories. Laboratories that use high proof ethanol extraction processes are the only tinctures worth buying. In using the tincture you want to deposit about 10ml under your tongue and hold it in your mouth as long as time permits. You will feel the effects within 10-15 minutes, and will hit a peak that lasts 20-40 minutes. After this 20-40 minute period the effects will start to wear off over a 30-60 minute time frame.

Also make sure to use with safety. It's important not to drive or use any machinery for at least an hour after the experience ends.

Chrono Smoke 2G

Chrono Smoke is an all-natural herbal blend with real effects. The effects are mild, but they are very noticeable. Most all-natural blends out there have zero effects. Chrono Smoke contains extracts that truly provide an effect. It won't blow your socks off, because it's absolutely chemical-free — but you will feel something, and it's more than you would feel with any other all-natural blend. Last but not least, the consistency of Chrono Smoke is perfect for rolling into a cigarette.

Overall, it's a very good experience. It allowed me to reach the level of comfortably numb that I desire after work without requiring an excessive amount. I would definitely recommend this as a relaxation aid because it totally calmed my anxiety. It also makes it easier to let go of blockages in the mind and open up to your environment. For example, watching a funny show became funnier. There's also definitely a little bit of euphoria – something I'm not used to feeling with all-natural blends.
